SOLIMOE BASIN ASSET VALUATION – MERLUZA EXTRACTION DATA

Data Context: Baseline Reference 2026

Operational Context: Post-Salt Production Assessment

RESERVES ANALYSIS AND METRICS:

1. Reserves Volumes: The strategic asset reserve sheet lists the current total inventory volume at 36 MMboe for the main fault block.
2. Investment Projections: Total development expenditure across the upcoming Investment Years requires an allocation of USD 15 million over a rolling 4-year plan.
3. Recovery Improvements: Implementation of secondary water injection arrays is projected to increase the total Recovery Factor by an absolute margin of 1.5% over the historical field decay curves.
