ANP REGULATORY AUDIT REPORT – BOARD OF ADVISORS REVIEW (BAR)

Official Reference: Ofício Nº 1044/2026

Regulatory Tracking: Processo 48500.001122/2026-44

CRITICAL INQUIRY AND COMPLIANCE STATUS:

1. Regarding the Economic Limits calculation for the Pre-Salt extensions, the Board demands a complete audit of the operational costs reported by the operators.
2. The Recovery Factor for the exploratory blocks remains unconfirmed due to high structural uncertainty in the lower reservoir boundaries.
3. Current estimations suggest that the End of Contract terms for the strategic production fields must be accelerated by 24 months unless the next investment block is authorized immediately.
